

Short-circuit evaluation practice #1

#1:

```
int x = 8;
```

```
int y = 4;
```

```
(x > y) && (y == 4)
```

Result (true/false)

Short Circuit (yes/no)

#2:

```
int x = 8;
```

```
int y = 4;
```

```
(x > y) || (y == 4)
```

Result (true/false)

Short Circuit (yes/no):

#3:

```
int x = 3;
```

```
int y = 10;
```

```
(y == 3) && (y < x)
```

Result (true/false)

Short Circuit (yes/no)

#4:

```
int x = 3;
```

```
int y = 10;
```

```
(y == 3) || (y < x)
```

Result (true/false)

Short Circuit (yes/no)
